

SANDERS FODDER

WINTER NEWSLETTER

THINGS TO DO IN WINTER

Weeds growing with recent rains - we have herbicides and spray equipment.
Time for new dog coat or horse rugs? Check our range in store.
With cool and dry days it's a good idea to offer salt or mineral licks to encourage water intake, especially in horses prone to colic.

Enter when you buy any two Barastoc/Virbac equine products

Red hen Dewormer - an easy way to dose your poultry
Ask our staff for details

Feed Seamungus after pruning winter dormant plants such as fruit trees and roses to prepare the root zone for Spring growth

NEWS AROUND THE SHOP

We are proud to be sponsors of the Trinity Interschool gymkhana, AKAS Templers Stockman challenge, Kingsford Pigeon club, Jack Russell Terrier Club.

As hay is still in short supply and will be for most of the year. Another option to hay is feeding barley straw, this will provide the necessary fibre component to your horse's diet. Extra nutrition in the form of a horse pellet or grains will also need to be added. There are also other fibre options available in bagged products if straw is not suitable. Speak to our staff to find a nutrition plan to suit your horse's needs.

some alternate fibre sources
